### Hand protection

The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other., Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time., Be aware that in daily use the durability of a chemical resistant protective glove can be notably shorter than the break through time measured according to EN 374, due to the numerous outside influences (e.g. temperature).

#### gloves suitable for permanent contact:

Material: butyl-rubber  
Break through time:  $\geq$  480 min  
Layer thickness:  $\geq$  0,7 mm

#### gloves suitable for splash protection:

Material: Nitrile rubber/nitrile latex  
Break through time:  $\geq$  30 min  
Layer thickness:  $\geq$  0,4 mm

### Eye protection

Tightly fitting safety goggles, Safety glasses with side-shields

### Skin and body protection

Wear suitable protective equipment.

### Hygiene measures

Avoid contact with the skin and the eyes. Handle in accordance with good industrial hygiene and safety practice. Keep away from food, drink and animal feedingstuffs. When using do not eat, drink or smoke.

### Protective measures

Avoid contact with the skin and the eyes. Wear suitable gloves and eye/face protection.

## ENVIRONMENTAL EXPOSURE CONTROLS
